Will be published Saturday, May 30 THE HEIRESS OF GREENHURST .-By MRS. ANN S. STEPHENS,

other of "Fashion and Famine" and "Old Homestead."
THE HEIRESS OF GREENHURST, while widely different from the previous novels of Mrs. STEPHERS in subject and locality, is not unlike them in intense interest of plot, bril liancy of imagination, fertility of incident, variety of character and passionate eloquence of style. It is more comprehensive in range than her other books, and the subject affords a greater range into the exercise of her vivid imagination. It awakens an immense interest, which its autobiographical form (a style always popular) serves greatly to highten; while its remarkable plot, its splendid group of characters, its unbackneyed incidents its passion, its pathos and its humor, render it, in our judgment,

the author's masterpiece."

GOOO ACRES OF LAND, with BLAST MILES from the CITY of BALTIMORE.

The undersigned, agent for the Curtis Creek Mining, Furnace and Manufacturing Company, offers this tract for sale in a single body or small farms. It is situated on Curtis Creek, five miles from Baltimore by land and nine miles by water.

The LAND is admirably adapted to MARKET GARDEN-

miles from Baltimore by land and nine miles by water.

The LAND is admirably adapted to MARRET GARDEN-ING, and is similar to the neighboring farms of Mesers. Cromwell, Linthicum, Stewart and others, from which large supplies of fruit and vegetables are animally sent to Philadelphia and New-York, and large profits realized therefrom.

Perts of the tract are well wooded with PINE and CHEST-NUT TIMBER, which can be shipped from the Furnace wharf in vessels drawing ten feet water.

The WATER-POWER is unfailing, the fall 22 feet, capable of running with ease six pairs of Burrs and the Biast Furnace.

STORE, STABLING, KILNS, &c., are erected near the Furnace. Ore can be delivered from neighboring ore banks by beats at the Furnace door. And Anthracite coal can be landed there at Baltimore prices or less.

The quantity of Wood in the vicinity, however, renders the location a most desirable one for a charces furnace.

The Furnace, with water-power and 300 acres of land attached, will, if required, be sold or leased on favorable terms.

To parties purchasing the whole tract, the charter of the Company could be transforred. It is one of the most liberal charters ever granted by the State.

This large property, in the vicinity of so large a city, promises to become exceedingly valuable in the course of a very few years, and presents an excellent opportunity for speculation to capitalists who may be able to bring it properly into market.

It is offered now at a low price and on satisfactory terms.
